**Lecture Hours:** TuTh, 8:00 – 9:30 am, 50 Birge

**Text:** H. S. Fogler, Elements of Chemical Reaction Engineering, 4<sup>th</sup> Edition, Prentice Hall, 2006.

**Course Grade:** The course grade will be determined by the following:

Homework:	5%
Design Projects:	5%
Midterm Exam 1:	20%
Midterm Exam 2:	20%
Final Examination:	50%

**Homework:** Homework will be assigned on Tuesdays and will be due at the beginning of lecture on the following Tuesday, unless indicated otherwise. Approximately five problems will be assigned each week (typically a subset of these will be graded). Solutions will be posted on the class website to this and prior homework.

**Computer Use:** The use of a numerical methods program for solving systems of ordinary differential equations and non-linear algebraic equations will be part of this course. GSIs will provide background for implementation of numerical methods in the beginning of the course. College of Chemistry facilities are

equipped with both MathCad and Polymath, which are sufficient for the types of problems being addressed in this course.

### **Grading Policies:**

1. Homework must be turned in at the designated time – **before lecture at 8:00 am**. Late problem sets will be corrected but assigned a score of zero.
2. Students should feel free to discuss the homework and design project assignment with others; however, **the final product must be entirely your own work**.
3. Although homework and design projects will not be regraded, requests for all homework/design project regrades can be made at the end of the course and will be taken into consideration when determining the final course grade.
4. Each student who submits a course evaluation on December 6, 2012 will have the **lowest four homework scores dropped** from their total score, when calculating the average homework course grade.
5. Exams will not be given early or late. If you miss an exam for a valid reason, your scores from other exams will be averaged to make up for the missed exam. Missing more than one exam will result in either an I or an F grade for the course. Missing an exam without a valid reason will result in a zero grade for that exam. Requests for exam regrades, if approved, will require the entire exam to be regraded (select portions will not be regraded).
